PROFILE INFO

Technical and detail-oriented Developer with over 9 years of product-building experience, specializing in custom PHP, WooCommerce architecture, and external API integrations. Proficient in writing clean, object-oriented PHP and developing custom WordPress plugins from scratch to optimize and automate operations.

3 years of experience bridging search psychology, technical SEO, and content pipelines.

Having scaled my own startup and launched physical products to the market, I bring a strong sense of technical ownership, task estimation, and a commitment to maintainable, production-ready code.

WORK EXPERIENCE

Independent freelancer

2023 - present

As a self-employed developer I had a chance to learn the whole process in web development. My main focuses are Web development and SEO, and search psychology.

**SEO specialist and data analyst
InstaDigital d.o.o.**

2022 - 2023

Effectively mined unstructured data spanning across several different international projects pointing out key future trends. Update content and links, optimizing copy and pages for SEO. Researching and implementing content recommendations for organic SEO success.

**CEO
Igraj Uči Rasti d.o.o.**

2016 - 2022

I ran a business that contributed to solving the problem of improper child development and lack of stimulation of cognitive and intellectual abilities. Through design thinking and lean methodologies, I designed and produced 13 toys.

**CEO
Unique Youth Organization**

2011 - 2016

Representing the organization, coordination and ensuring of necessary resources for the operation and implementation of project activities, supervision and management of the overall work of the organization.
